

Project name	Cheese Manuf.
Country	Hilmar, California, USA
Flow rate	160 m3/h; 700 USgpm
Filtration degree	100 micron
Water source	Well
Filtration solution	1 x 6" SAF-4500 Filter
Installation date	6/2000

Cheese factory requires filtration of plant cooling towers. The SAF-4500 was installed due to its "no interruption of flow" and compact design. Customer's satisfaction with their first filelet led to other SAF units being installed at this plant.
