

HIGH-RISE BUILDINGS

Project name	Los Angeles International Airport
Country	Los Angeles, California, USA
Application	Cooling tower
Flow rate	11 m ³ /h; 50 USgpm
Filtration degree	25 micron
Filtration solution	3" SAF-1500 Filter, Skid mounted pump system
Installation date	12/2002

The filter was rated at 10% side stream on the full tower flow of 500 gpm. Since the installation, the tower water is significantly cleaner, cleaning maintenance is down and so is the use of chemical additives.
