|---------------------|---------------------|
| Project name        | Oil Manuf.          |
| Country             | U.S.A.              |
| Application         | Cooling water       |
| Flow rate           | 180 m3/h; 970 USgpm |
| Filtration degree   | 25 micron           |
| Water source        | Circulating water   |
| Filtration solution | 1 X 8" EBS Filter   |

Filtration of cooling water in a process of testing the performance of engine oils.
