

## POWER GENERATION

Project name	TID
Country	Turlock, California, USA
Application	Cooling water
Flow rate	90 m <sup>3</sup> /h; 400 USgpm
Filtration degree	100 micron
Water source	Canal
Filtration solution	1 x 6" SAF-6000 Filter
Installation date	1995

TID, a natural gas power plant in the San Joaquin Valley, requires constant cooling of their facility. Both cooling towers and boilers rely on this water for operation. The installation of this SAF-6000 and its continued, successful use, prove that this filter is reliable and made with quality components.
